Profile

Business analyst and problem-solver who has built a career across two countries, from running operations for a busy events studio in Chennai to supporting public services at Kent County Council. Along the way I have sold, managed, analysed and built: leading a studio's move from spreadsheets to a fully digital system, creating Power BI dashboards that turn raw data into decisions, and designing automated workflows that replace manual work. I combine an MSc in Business Analytics with real commercial experience and a habit of using new tools, including AI, to solve practical problems. I now want to bring that mix to KCC's commercial function, helping the council get more value from its procurement, contract and spend data.

Key skills

- **Data analysis and insight:** quantitative and qualitative analysis turned into clear conclusions and recommendations.
- **Reporting and digital tools:** Power BI, advanced Excel, SQL, Google Analytics, Power Automate, SharePoint and Zoho, and AI-assisted development with Claude Code.
- **Communicating insight:** explaining complex data clearly and concisely to non-specialist audiences.
- **Commercial awareness:** supplier reporting with Skanska, and negotiating pricing and contract terms.
- **Project support and process change:** requirements, planning, testing and training colleagues on new systems.

Professional experience

Business Support Officer · Kent County Council, Folkestone · Jan 2025 – Present

- Designed and built an automated facilities management system for the Family Hub Programme in Power Automate and SharePoint, replacing manual request tracking with a single, accurate record of every request.
- Built automated reporting for Skanska, KCC's facilities management partner, to improve the accuracy and speed of information shared with the supplier.
- Gathered requirements from service users, tested workflows and presented the solution to management. Now leading Phase 2 development ahead of implementation discussions with Skanska.
- Provide day-to-day business support across council systems, keeping records accurate and following data protection and access controls.

Junior Analyst (Apprenticeship) · Neural Hue, London · Sep 2025 – Apr 2026

- Built and maintained Power BI dashboards tracking platform performance and key metrics, giving the team clear, up-to-date insight to inform product and business decisions.
- Analysed quantitative and qualitative data to identify trends, issues and opportunities, and turned findings into practical recommendations.
- Presented insight to non-technical stakeholders clearly and concisely, explaining what the data showed and what action it supported.

- Checked the accuracy and quality of data across an AI-driven talent search platform, flagging issues so reports could be trusted.
- Gathered and documented requirements from users and stakeholders, and supported planning, testing and delivery with developers to agreed deadlines.

Operations Manager · Studio 31, Chennai · Sep 2019 – Aug 2021 (promoted from Business Development Executive)

Business analysis, data and digital transformation lead for a studio delivering 365+ events and 30+ conferences, coordinating teams, suppliers and clients.

- Analysed the studio's Excel-based processes and mapped the client journey from enquiry to delivery, identifying the manual workarounds behind missed follow-ups and inaccurate records.
- Gathered requirements from management and staff, then designed and configured an integrated, business-critical Zoho system (CRM, Creator, Sign, Meeting and Books) with custom fields, pipeline stages, workflows and automated follow-ups.
- Defined KPIs and built reports and dashboards tracking enquiries, conversion rates, bookings and revenue, giving management clear insight to improve pricing, follow-up and resource planning.
- Wrote work instructions and knowledge base guides, and trained staff to adopt the new system with confidence.

Business Development Executive · Studio 31, Chennai · Aug 2018 – Sep 2019

- Exceeded revenue targets by 20% through sales and client management.
- Tracked leads, enquiries and sales in Excel, analysing conversion and revenue trends to report performance to management and prioritise high-value clients.
- Prepared client quotes and proposals, negotiating pricing and agreeing terms to secure bookings.

Projects (built with Power BI and Claude Code)

- **NHS A&E performance dashboard:** an interactive Power BI dashboard analysing public NHS performance data and presenting trends clearly for a non-specialist audience.
- **Invictas Cricket Association website** (invictascricket.com): a branded club website, including a digital membership card tool, deployed on Vercel with the domain bought on Namecheap and DNS configured to connect it.

Education and continuous professional development

MSc Business Analytics (Merit) · University of Kent · 2021 – 2022

BBA Business Administration · SRM University of Arts and Science, Chennai · 2015 – 2018

Certifications: Excel for Business Analysts (IIBA) · Power BI Internship (PwC Europe) · CBIP preparation course (Udemy) · Junior Analyst Apprenticeship, Neural Hue (2025 – 2026)

Leadership

Founding Chairman · Invictas Cricket Association, Canterbury · 2026 – Present

- Founded the Kent Cricket Board-affiliated club in June 2026 and lead its committee: wrote the constitution and governance rules, set up membership payments with an open monthly income and expenditure statement, and lead outreach to clubs, councils and businesses for fixtures, ground hire and sponsorship.
